Customer Reviews

I wish this book was available to me a few years back when I was first deploying AirWatch at Florida Hospital!! It would have saved me a lot of time. So many things to learn about, such as AirWatch ACC, SEG, MAG, MAM, MCM, architecture, profile builds and day to day support. This book is a must read for any serious professional who is new to mobility and wants to be on the fast track to implementing AirWatch on a corporate environment!! Do your research....AirWatch EMM is rated one of the best in the mobility field (if not the best) and the demand for experienced AirWatch Administrators is growing. An investment well worth it!!Senior Enterprise Mobility Engineer

Entering the mobility space cold-turkey can seem like jumping onto a moving treadmill going 15 mph. You don't want to land flat on your face, but thanks to resources like this book, you won't have to. Learning AirWatch is a terrific guide for MDM professionals ranging from the incoming analyst to the one man IT show.

This book has been a great resource for our team as we have plunged into the MDM space. Whether you are just starting out with Airwatch, looking for a quick reference source or training other team members, this has proven valuable and well worth the read.
