Customer Reviews

This book had some general ideas that were good, but just didn't expand enough with some unique ideas to help an addict. This is why: I started addictive behaviors when I was an infant, sucking my thumb (They tried everything to stop that, even inserting a metal spike thing in my mouth, but nothing worked.), trichotillomania (Where you pull your hair out.) before a year old, then doing multiple things like gymnastics-band-dance at the same time on top of the other 2 habits, and then at 18 smoking and partying. I can exercise and then I will reward myself with a break and a cigarette. I can drink orange juice and still smoke after. I have a high desire not to do this, but this book didn't tell me how to cure what started the addictive behaviors (anxiety disorders) and didn't give me many unique options to redirect my energy. There were a lot of spelling and grammatical errors also. I think that the author has potential.
