Customer Reviews

I really struggled with rating this book appropriately. Give me a read and I'll try to explain why. I purchased this book in November and just recently had a chance to sit down with it. I have been an active seller on ebay since May of 2015. I have been on ebay since 2001. So, I knew the basics of getting around ebay, but not a lot about selling on ebay when I made this purchase. Unlike a lot of sellers, I actually started with FBA before branching into Ebay. I am in Glen's facebook group, Ebay Thrifters, and find the information provided there very useful. I also like that Glen keeps the group relatively drama free. I honestly don't remember where I originally came across this book, but I think it's safe to assume it was on Glen's facebook page. I am an avid reader, or at least I was before having children. I can be a little particular when it comes to grammar. IN my opinion, even in a phenomenal book, occasional grammar mistakes pulls away from the content. I find it distracting and sometimes want to pull out my "red pen". Grammar mistakes seem to be happening more often with self printing and reliance on computers for assistance. Having explained my personal stance on grammar, I will tell you that the grammar in this book was nothing short of atrocious. We're not talking about a few mistakes here and there, we are talking about flat out run on sentence/paragraphs, misspellings, missed punctuation. If you can think of a grammatical error, it is probably in this book. That alone made it very difficult for me to give this book a good rating. I also didn't care for the general organization and setup of the book. It really felt "thrown together", kind of like a last minute high school project.
